

WHAT WE SUPPLY

The division provides a full range of consumables for mineral testing, including items used in crushing, grinding, sieving, and chemical analysis. Solutions are suitable for techniques such as XRF, ICP, and fire assay, using durable materials that withstand harsh mining environments.

Our Products

- Crucibles (Clay, Graphite, Platinum)
- Geochemical plastics of all sizes
- Labels
- Cupels (Magnesia, Bone Ash)
- Sample Bags & Tags (Calico, Plastic, Kraft)
- Fire Assay Tools and Accessories
- Pulp and Chip Sample Bags
- Assay Fluxes (Litharage, Borax, Soda Ash, Silica)
- Filter Papers
- Weighing Boats
- Sample Containers and Bottles
- Custom-Made Laboratory
- Consumables (as per client specifications)

WHO WE ARE

Tincol Mining Laboratory Consumables is a specialist division of Tincol Group, focused on supporting African mining laboratories with reliable, high-performance consumables. The division exists to help mines and labs achieve accurate, repeatable results in sample preparation and analysis, while keeping operations efficient and compliant.

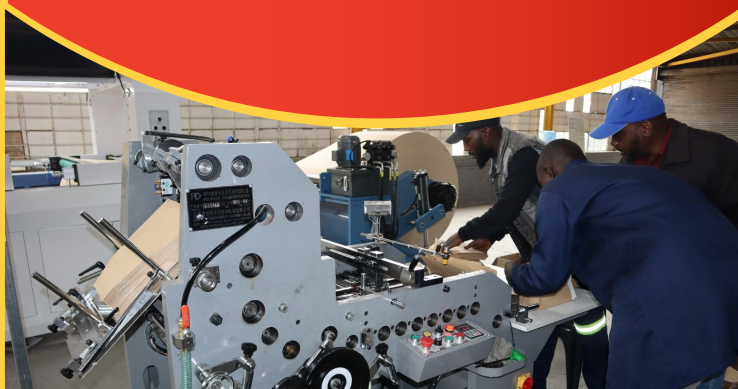

Our Vision

To be Africa's leading provider of innovative and reliable mining laboratory consumables, driving quality and efficiency in mineral analysis.

Our Mission

To manufacture and supply world-class mining laboratory consumables tailored to the rigorous demands of the African mining sector; to deliver consistent quality, precision, and durability in all products; to contribute to the sustainability and development of African mining through reliable laboratory support solutions.

“ EMPOWERING PRECISION IN AFRICAN MINING ”

WHY CHOOSE US

Tincol stands out with local expertise in Midrand, offering customized solutions, fast delivery, and technical support tailored to South African mining challenges. Proven reliability ensures minimal disruptions and maximum value for lab operations.

01 African Presence

Strategically located for rapid delivery across the continent.

02 Reliable Supply Chains

Robust manufacturing and distribution networks.

03 Client-Centric Approach

Custom solutions and responsive support.

04 Reliable Supply Chains

Trusted by top-tier mining laboratories and exploration firms.

GET IN TOUCH

Tincol offers consultative support to match the right consumables to each lab's processes and equipment. Clients can connect through the Tincol website for product information, quotations, and technical assistance.
